

Vinyl Lettering Installation Instructions

Before you begin, be sure the surface you will be installing the vinyl lettering on has been thoroughly cleaned and dried.

STEP 1: With the backing still in place, align your lettering on top of the surface you want to install it on. Hold the lettering in place by securing it with masking tape along one of its edges.

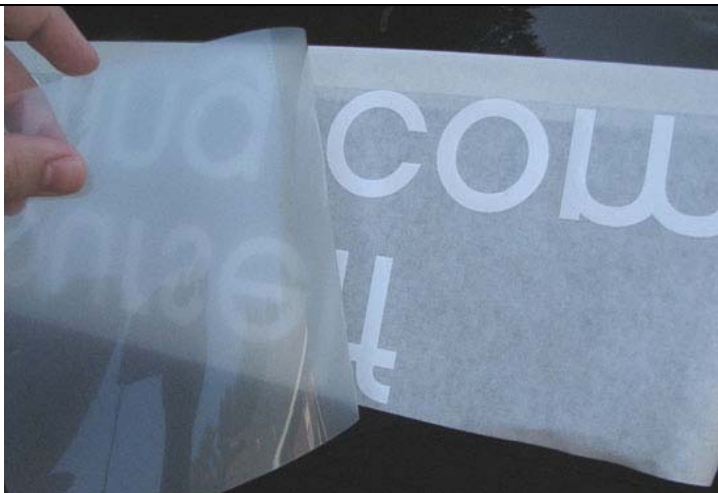

STEP 4: Carefully flip the lettering back over and press it firmly into place, smoothing out any wrinkles that may arise.

STEP 2: Fold the lettering over along the edge of the masking tape that is holding it in place. Note that the lettering's exterior will now be facing you.

STEP 5: Remove the application tape.

STEP 3: Remove the backing from the lettering, leaving the letters attached to the application tape.

DONE!
